

Greeting to you.

How are you? sorry for delaying to write you.

We are doing fine till now. In these days,

I am busy for the Church building project. I have to work hard for the dealing with Church property first with the Municipality as they doing land pulling in our church area. They have returned back to our church land and again we started worship building designing, the designing details was passed by local government after three months. Only after the acceptance of our building project design we have started building work. As soon as we started building works the monsoon started it did disturbances for the builders how ever we have finished the foundation level. The worship building is full of earthquakes proof. It has 20 pillars each measure with 16" diameter. In a each pillars made with 25mm 12 pieces iron bars. Though it is expensive but strong

building we are having by the time we will complete it. We have got permission to build up to 5 levels but this time we will be building two levels due to limited resources. There will be One level for Sunday school and day care center and another for Church service. We are aiming this building this building to use for multiple purposes for the ministry. Please keep praying. Sorry to tell you this bad news again another disaster Landslide happened at our village close by our branch church in 2nd August due to the heavy rain. 18 houses has been damaged and two people been disappeared in the Landslide. 6 oxen 14 goats and many chicken were buried by landslide. 150 people are displaced. This is the time of monsoon they hardly had completed shelter after the horrible earthquake of 2015. The fact is that now once again their shelter is gone leaving back them the debts of house which is not paid yet.

We visited the village in this difficult situation with relief materials mainly food. Therefore People would know we love them in the time of hardship.
